

From June 16th to 19th in Lima, Perú, leaders of theatres, festivals, and opera companies from Ibero-America, as well as cultural agents from Perú and around the world, will gather once again, this time around the theme: *Governance and Effective Leadership*. We will focus on people, and particularly those who lead organizations and teams in these times of increasing instability, digitalization, personal disconnection, financial and social demands. These are times when we have to be and do so many things, leaving us a few moments to stop, listen, and reflect.

From boards of directors to CEOs and all those who lead work teams, we will ask ourselves: What kind of leadership do we need today? What should a leader be like today? What innovative leadership models exist?
